

Graphic Design for Digital Media

Camilo Ramirez

Project: 10 Words (DUE 9/22/08)

Find 10 words:

Look in the Dictionary for 10 words that really appeal to you.

Choose 5 to Illustrate:

Look at the 10 you have and pick the 5 that would best be turned into typographic illustrations as shown in-class.

Conceptual Requirements:

Move, scale, rotate or alter the the letters in the word, but be sure that the original word is still legible. Choose a font that helps you communicate the emotion, idea, and meaning of the word. Use your document area (8"x8") to your advantage, carefully considering the scale and position of the word with that arena.

Technical Requirements:

Work with Adobe Illustrator.

Define a document that is 8"x8".

Do not use any color; Use only black and/or shades of gray.

Print your Illustrations on good quality presentation paper.

Physically trim the pieces down to 8"x8" for Presentation.

Create a separate Label for the definition of the word.
