

Project 3 (Part C) **Source/Video**

Project Description:

For this assignment you will continue to explore your source idea in video form. You will take feedback provided in class and create a storyboard to plan an edit of your existing 5 aspects down to a one-minute short video. Then using iMovie, you will edit your 5 existing one-minute sections down to a final one-minute piece. You will then create a playable DVD with your video for final presentation.

Guidelines

- Create a storyboard that condenses your current 5 aspects into a single one-minute piece. Your final one-minute piece must include at parts of each of your 5 sections of video. DUE in class today!
- Using iMovie and your new storyboard, edit your video down to one minute that clearly reflects your subject as it has developed and progressed.
- You may not add any music for this project, but you can use ambient noise recorded while shooting.
- Use iDVD to create a playable DVD for the final presentation.

DUE:

- **April 10th**: 1 Storyboard to plan your final one-minute video.
(2 copies, one for you one for me)
- **April 17th** Final Presentation and critique of your 1 minute DVD video project.
